Redmine - Feature #7949

Tab with list of changed files from repository that are related to "this" issue

2011-03-21 16:34 - Niels Bischof

Status:	Closed		**Start date:**	2011-03-21
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid			

Description

A very popular feature of JIRA is the ability to see all related repository (svn, etc.) commits in a dedicated tab of an *issue* page.
This list contains the commit message and all files that changed.
(see http://www.atlassian.com/software/fisheye/tour/jira-issues-source-code.jsp)

Currently, Redmine only offers to navigate **to** an issue from the repository view (if the issue number is contained in the log message).
Redmine would gain much usability if it would have the other direction too, i.e. seeing (and/or navigating to) the changed source files related to an issue.

(BTW, I actually thought this feature was the reason that keywords like "references", "refs" were introduced to be used in log messages)

History

#1 - 2011-03-21 16:46 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

> (BTW, I actually thought this feature was the reason that keywords like "references", "refs" were introduced to be used in log messages)

It is, commit messages are appended to the issue page since r1085.

Have a look at issue #7246, you can't miss them.
