

Redmine - Feature #7956

Show Roadmap tab when subprojects have defined versions

2011-03-22 16:27 - Maciej Liżewski

Status:	Closed	Start date:	2011-03-22
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Roadmap	Estimated time:	0.00 hour
Target version:	4.2.0		
Resolution:	Fixed		
Description			
<p>If root project does not have defined versions, but subprojects have them, there is no "roadmap" menu item in root-level project. I guess this is common situation when you use project nesting to simulate development areas, for example: root project stands for "all projects for Client X" so you could use reporting aggregated per-client...</p> <p>You can always enter the root-level roadmap simply by specifying "project-name/roadmap" in URL, but this is not so pretty...</p>

Show Roadmap tab when subprojects have defined versions (#7956).

Patch by Go MAEDA.

History

#1 - 2011-03-22 16:51 - Etienne Massip

- Category set to Projects

#2 - 2011-10-14 09:50 - Etienne Massip

- Category changed from Projects to Roadmap

#3 - 2011-10-14 10:16 - Terence Mill

We are using hierarchical project organization heavily, but some of our parent "project" just implement departments under which real projects with planned version are configured. In the departments parent projects we activated issue module and hoped to see the Versions of all sub projects in its roadmap.

But this only works if at least one version is configured in department (parent) project. If not the Roadmap tab isn't even displayed!

This behaviour is very wired and doesn't make sense for. Either in every case version are showed in the roadmap (for all childs too) or not, but not only if parent also has version defined.

Thats why we think it is more a bug than a feature, as it behaves now!

#5 - 2019-10-06 14:47 - Go MAEDA

"Roadmap" tab is shown in the parent project if one or more shared versions visible to the parent is defined in subprojects (#2666).

#6 - 2020-05-27 14:45 - Go MAEDA

I think this request is a natural one.

The roadmap page shows versions in subprojects if "Display subprojects issues on main projects by default" (Administration > Settings > Issue tracking) is enabled.

So, the tab in the project menu should be displayed when subprojects have any version even if the current project has no version.

The following patch changes the behavior of the menu.

```

+1

Thanks for patch...

Works with:

Redmine 4.1.0.stable.19444

#14 - 2021-04-05 22:36 - Marius BALTEANU

- Related to Defect #34983: Roadmap tab is missing if there are only inherited from parent project versions added
