**Description**

Hello,

I would like to suggest implementation of filters for news in the way similar to the issues' filters. An example is 'filter news by author'. Now we can see all the news from the Redmine's root page (the link 'View all news'). It would be nice if this page has filters. At first, by author, by project, by time period. Indeed, news + filter by author is very close to a blog.

Ivan
