

Redmine - Patch #8008

Fix 'rdm-mailhandler --help' not working

2011-03-29 09:54 - Thomas Weiß

Status:	Closed	Start date:	2011-03-29
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:			
Description			
Invoking "rdm-mailhandler --help" gives the following error:			
<pre>\$./rdm-mailhandler.rb --help ./rdm-mailhandler.rb:103:in `initialize': undefined local variable or method `usage' for #<RedmineMailHandler:0x7f7335c540b8 @issue_attributes={}> (NameError) from /usr/lib/ruby/1.8/getoptlong.rb:613:in `each' from /usr/lib/ruby/1.8/getoptlong.rb:610:in `loop' from /usr/lib/ruby/1.8/getoptlong.rb:610:in `each' from ./rdm-mailhandler.rb:96:in `initialize' from ./rdm-mailhandler.rb:167:in `new' from ./rdm-mailhandler.rb:167</pre>			
The attached patch fixes the issue by correcting the call to RDoc.usage (line 103).			

History

#1 - 2011-03-29 10:53 - Etienne Massip

Which version of Redmine are you using ?

#2 - 2011-03-29 10:53 - Etienne Massip

And of Rails / Ruby ?

Thanks

#3 - 2011-04-03 18:56 - Jean-Philippe Lang

Btw, we should use optparse instead for ruby1.9 compatibility: <http://redmine.ruby-lang.org/issues/show/2713>

#4 - 2011-04-19 10:05 - Etienne Massip

- Target version set to Candidate for next major release

#5 - 2012-05-08 12:55 - Jean-Philippe Lang

- Status changed from New to Closed

- Target version deleted (Candidate for next major release)

Superseded by [#10837](#).
