# Redmine - Defect #8056

## Some fields should be shown LTR even in RTL locales

2011-04-04 13:54 - Ebrahim Mohammadi

|---|---|---|---|
| **Status:** | New | **Start date:** | 2011-04-04 |
| **Priority:** | Normal | **Due date:** | |
| **Assignee:** | Azamat Hackimov | **% Done:** | 0% |
| **Category:** | UI | **Estimated time:** | 0.00 hour |
| **Target version:** | Candidate for next major release | | |
| **Resolution:** | | **Affected version:** | 1.1.2 |

**Description**

Some parts of pages (specially some form fields) should be shown as left-to-right (LTR) even in right-to-left (RTL) locales.

Some important fields which should always be shown as LTR everywhere are:

- Email address (line edit)
- URL (line edit)
- Host name (line edit)
- Username (line edit)
- Password (line edit)
- Language (selection list)
- Time zone (selection list)
- Editor (selection list in admin settings)
- Encoding (selection list in repository settings)
- All numerical fields (examples: issue id of parent, estimated hours, activity hours, % Done, maximum file sizes, ...)

There may be other always-LTR fields. But finding all of them is an exhaustive task which I haven't done yet.

### History

#### #1 - 2011-04-04 14:05 - Etienne Massip

*- Target version set to Candidate for next major release*

#### #2 - 2011-04-05 13:00 - Ebrahim Mohammadi

Yet another important always-LTR field: Project identifier (line edit) which can only contain ASCII alphanumeric characters regardless of current locale.

#### #3 - 2011-04-07 07:48 - Ebrahim Mohammadi

The first paragraph of /admin/info page (which shows name and version of running Redmine and name of the backend, both always in English) is always-LTR.

#### #4 - 2011-04-07 09:43 - Ebrahim Mohammadi

"Age" and "Date" columns of repository view must be RTL in RTL locales. But they're currently always LTR wrongly.
