

Redmine - Defect #8057

Some fields should be shown LTR even in RTL locales

2011-04-04 13:55 - Ebrahim Mohammadi

Status:	Closed	Start date:	2011-04-04
Priority:	Normal	Due date:	
Assignee:	Azamat Hackimov	% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.2
Resolution:	Invalid		
Description			
Some parts of pages (specially some form fields) should be shown as left-to-right (LTR) even in right-to-left (RTL) locales.			
Some important fields which should always be shown as LTR everywhere are:			
<ul style="list-style-type: none">• Email address (line edit)• URL (line edit)• Host name (line edit)• Username (line edit)• Password (line edit)• Language (selection list)• Time zone (selection list)• Editor (selection list in admin settings)• Encoding (selection list in repository settings)• All numerical fields (examples: issue id of parent, estimated hours, activity hours, % Done, maximum file sizes, ...)			
There may be other always-LTR fields. But finding all of them is an exhaustive task which I haven't done yet.			

History

#1 - 2011-04-04 13:58 - Ebrahim Mohammadi

This is exact duplicate of [#8056](#), so delete it please.
It happened because I got error 500 after first submit and resubmitted it. I got error 500 again. Then I found out the issue was created twice despite the error messages.

#2 - 2011-04-04 14:05 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid
