<b>Description</b>			
Some "notifiable" names are not i18n-enabled. I see three untranslatable strings in /settings?tab=notifications:			
<ul style="list-style-type: none"><li>• Issue note added</li><li>• Issue status updated</li><li>• Issue priority updated</li></ul>			
I tracked the issue back to SettingsHelper::notification_field(notifiable) which uses I_or_humanize on notifiable.name.
