

Redmine - Feature #8080

Option for alphabetical only sorting of versions (date ignored)

Description Right now sorting issues by version, the sorting of versions in the 'target version' field, and the sorting of versions in the Project > Settings > Version page are all automatically sorted first by date, and then alphabetically. It would be great if there were an option (in Administration > Settings for instance) to make versions be sorted alphabetically, ignoring the date. This would make it much easier to find the desired version when reporting an issue as the number of open versions increases.
