

Redmine - Feature #8095

Allow overriding the default text formatting in each project

2011-04-07 12:28 - Ebrahim Mohammadi

Target version:			
Resolution:			

Description

It would be good to let the text formatting be selected per project, rather than only a global default. It would be useful for bigger installations that have more diverse set of users.

History

#1 - 2011-04-10 17:56 - Ebrahim Mohammadi

It would be nice to let formatting of project's Wiki be selected independently of issues (and other parts') formatting.

#2 - 2011-05-04 00:09 - Ebrahim Mohammadi

- *File per-project-formatting.diff added*

I did an implementation found in per-project-formatting in: <https://bitbucket.org/ebrahim/redmine-patches/qseries> (I've attached an snapshot of the patch)

I'd like to receive reviews and comments on the implementation. I'd also like to know if it could be merged upstream.

#3 - 2011-05-04 02:36 - Toshi MARUYAMA

Redmine has tests.

<https://bitbucket.org/redmine/redmine/src/f4d8b015a399/test/>

Could you add tests for this patch?

#4 - 2011-05-04 20:50 - Ebrahim Mohammadi

Shall I change and extend existing tests, or shall I write a new test case in a separate file? May you give me an starting point? (I'm not deep into Rails.)

#5 - 2014-01-17 02:09 - Ebrahim Mohammadi

And now the plugin thanks to a-ono: http://github.com/a-ono/redmine_per_project_formatting

- Has duplicate Feature #19112: Markdown for specific projects added

#14 - 2015-04-11 07:00 - Go MAEDA

- Has duplicate Feature #19591: Text formatting (textile/markdown) configurable on a per project basis added

#15 - 2015-04-29 07:41 - Go MAEDA

- Related to Feature #5112: Texting formatting setting is global (Allow override in module level) added

#16 - 2015-06-12 12:13 - George Notaras

Are there any plans to implement this?

#17 - 2015-06-15 05:49 - George Notaras

Alternatively, a special control tag could be invented, for instance `#markup:textile` or `#markup:markdown`, which, if found as the first line of the text, it would indicate the parser that should be used. This is an easy way to add maximum flexibility without having to make decisions about the used markup at the web site or project level. Such a solution would also be helpful in cases where markup needs to be migrated at slow pace page per page.

I hope someone looks into this issue more closely, because right now, IMO, Redmine is doing it wrong.

Thanks in advance.

George

As the original requestor of the Markdown formatting feature, I have to shamefully admit that I have not yet Flipped The Big Switch.

The reason for this is that conversion from Textile to Markdown is an all-or-nothing proposition right now. Having this setting per-project would make it *much* simpler: not only to convert a site gradually, project-by-project, but also to start new projects off with Markdown. I wouldn't mind sealing some projects and starting fresh ones in some cases, just to force this formatting transition on its users.

So here's my vote to making the Textile/Markdown flag settable for each project!

#19 - 2015-11-07 15:37 - Jean-Claude Wippler

What is the status of this feature request? Could and will a per-project Markdown/Textile setting be implemented?

With such a feature, migration becomes a per-project issue, and new projects could be set up appropriately. That last benefit alone would solve a major headache for me - as it is, I can't even set up a new Markdown area.

I'm eagerly looking forward to a response / verdict from one of the maintainers...

We are using Redmine for several years with textile formatting and we would like to switch to Markdown progressively. Will this feature request be implemented soon ?

#26 - 2019-09-04 19:44 - Peter Volkov

Currently, we use the following plugin:

<https://www.redmine.org/plugins/per-project-formatting>

but it would be nice to have this upstream. Or even per page formatting!

#27 - 2023-02-23 22:17 - Holger Just

- Has duplicate Feature #37365: Allow users to choose textile or markdown formatting added

#28 - 2023-03-02 11:01 - Stefaan Ellebaut

+1 on this.

We have a redmine instance containing projects of over a decade. We would like to switch to CKeditor but up till now all is done in textile formatting. Changing the global setting to the new editor would break all existing wiki pages and issue descriptions and notes, which makes a switch impossible now.
