Redmine - Feature #8099

multiple project status summary page

2011-04-08 01:06 - Joseph Julicher

Status:	New	**Start date:**	2011-04-08
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Projects	**Estimated time:**	0.00 hour
Target version:			
Resolution:			

Description
I would like to view all of the projects my team is working on and see at a glance the completion status. This should be in the projects view.

Can you describe what you mean by "completion status"? Are you saying that all of your projects have versions (or milestones)?

I think this could be better described as under each project (and subproject) the ability to see versions and their statuses. Perhaps a global default date of how recent a version became complete can be added so we don't have a listing of 80 versions for one project which scrolls the whole page when 75 versions have been "complete" for 3 months or more.

Perhaps in the UI we could have a "versions" link which could expand to show the top 5 versions with a "more" link which goes to the roadmap. Or for a graphical representation, a small graph with the version on the Y axis, and the % complete on the X axis would suffice.

Is #9697 what are you looking for?

#3 - 2012-12-18 18:19 - Dmitry Babenko

Duplicates #1342.

Progressive Projects List plugin solves this issue.
