Category:	Email notifications		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	1.1.1

Description

When I try to send test email, I see error message:

```
An error occurred while sending mail (end of file reached)
```

Redmine v. 1.1.1.stable (MySQL)

Ruby:

```
/var/lib/redmine/config/../vendor/rails/railties/lib/rails/gem_dependency.rb:119:Warning: Gem::Dep
endency#version_requirements is deprecated and will be removed on or after August 2010.  Use #requ
irement
About your application's environment
Ruby version              1.8.7 (x86_64-linux)
RubyGems version          1.3.7
Rack version              1.0
Rails version             2.3.5
Active Record version     2.3.5
Active Resource version   2.3.5
Action Mailer version     2.3.5
Active Support version    2.3.5
Edge Rails revision       unknown
Application root          /var/lib/redmine
Environment               production
Database adapter          mysql
Database schema version   20101114115359
```

config/email.yml:

```
production:
  delivery_method: :smtp
  smtp_settings:
    address: smtp.spaceweb.ru
    port: 25
    domain: MySiteDomain.ru
    authentication: :login
    user_name: "USER"
    password: "PASSWORD"
```

How can I fix it?

History

#1 - 2011-04-08 17:25 - Etienne Massip

Check your log files (Redmine's production.log and your Ruby application server's).

#2 - 2011-04-09 08:11 - Anton Romanov

- File sending_email.log added

No errors about failed sending message in production.log even on debug log level.

#3 - 2011-04-09 08:17 - Anton Romanov

In apache logs I see nothing about failed sending.

#4 - 2011-04-09 13:06 - Etienne Massip

Could you try to run Redmine with ruby script/server to see if this reproduces ?

Did you modify your app/views/mailer/test.text.(html|plain).rhtml contents ?

#5 - 2011-04-11 10:39 - Anton Romanov

Etienne Massip wrote:

What is it and how can I run it?

> Did you modify your app/views/mailer/test.text.(html|plain).rhtml contents ?

No, I didn't modify these files.

#6 - 2011-04-11 10:42 - Etienne Massip

Just stop your Redmine instance, go to your Redmine installation directory and run ruby script/server RAILS_ENV=production.

#7 - 2011-08-03 08:21 - Anton Romanov

I tried to upgrade to version 1.2.1 and after that I see same error.
When run ruby script/server RAILS_ENV=production it show:

```
$ ruby script/server RAILS_ENV=production
=> Booting WEBrick
=> Rails 2.3.11 application starting on http://0.0.0.0:3000

    from /var/lib/redmine-1.2.1/vendor/rails/railties/lib/commands/server.rb:84
    from /usr/lib64/ruby/site_ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require'
    from /usr/lib64/ruby/site_ruby/1.8/rubygems/custom_require.rb:31:in `require'
    from script/server:3
```

And nothing working.
