

Redmine - Patch #812

Include issue refs on closed issues

2008-03-08 02:59 - John Goerzen

Status:	Closed	Start date:	2008-03-08
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:			
Description Consider a case where issue 5 exists in the issue database already and is already marked closed. If you have a "closes" statement in your changelog that references a bug that's already closed, no linkage will be applied because of this: <pre>next if issue.status.is_closed?</pre> This patch moves the code that updates referenced_issues above that test, so that it still will avoid a duplicate attempt to close the issue, but nonetheless will add the reference to the issue.			

History

#1 - 2008-03-08 12:29 - Jean-Philippe Lang

This code:

```
next if issue.status.is_closed?
```

will only prevent lines 87 to 92 to be executed.
A referenced and closed issue will be associated with the commit. I've made the test and it works as expected.

Did you experience a problem with this ?

#2 - 2008-03-08 13:52 - John Goerzen

- Status changed from New to Closed

You're right. Further testing has showed that I was confused because the Resolved status wasn't a "closed" status by default. Sorry for the noise.
