

Redmine - Defect #8137

HTML email doesn't obey directionality of locale

2011-04-13 10:42 - Ebrahim Mohammadi

Status:	Closed	Start date:	2011-04-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.2
Resolution:	Duplicate		
Description			
HTML emails currently miss directionality, while they should obey directionality of some locale. Some choices:			
1. site-wide default locale			
- Easiest <i>workaround</i> to implement.			
2. recipient user's locale			
- Most irrelevant and hardest to implement workaround! Because language of content is not necessarily same as content, and on the other hand you have to generate the email with both directions and select which to send to each recipient.			
3. locale of contents of originating project (needs #8058 to be implemented)			
- The correct solution IMHO.

+1

#4 - 2017-11-26 05:28 - Go MAEDA

- Related to Feature #26791: Send individual notification mails per mail recipient added

#5 - 2018-11-30 14:11 - Marius BALTEANU

- Related to deleted (Feature #5990: Email notification should reflect user language setting)

#6 - 2018-11-30 14:11 - Marius BALTEANU

- Duplicates Feature #5990: Email notification should reflect user language setting added

#7 - 2018-11-30 14:14 - Marius BALTEANU

- *Status changed from New to Closed*

- *Resolution set to Duplicate*

I'm closing this in favour of #5990 (is the same feature request IMHO).
