Description I'm working on a app which use Redmine API to list an create issues. I made my app is using the JSON feed available only on the latest version. So I need to check first witch version does Redmine run. Is there any way to do that? Should this feature be include in the next release? Thanks			
Related issues: Is duplicate of Redmine - Feature #5901: REST API to expose the Redmine version New 2010-07-18

Maybe a simple meta in the layout should be a great idea?
Something like that in the base.rhtml:
<meta name="Generator" content="<%= Redmine::Info.versioned_name %>" />

What do you think about?
any chance to add it in the official release?

#2 - 2011-04-14 00:41 - Thibaut LE LEVIER

Sorry for the blind comment, the code in the content attribute is the Info.versioned_name from the Redmine instance
Same as in the admin/info page

- Category set to Plugin API
- Priority changed from High to Normal
- Target version set to Candidate for next major release

#4 - 2011-04-14 09:36 - Etienne Massip

- Category changed from Plugin API to REST API

#5 - 2011-04-14 12:37 - Thibaut LE LEVIER

May I help to add this feature?

#6 - 2011-04-14 12:48 - Etienne Massip

Yes, you could add xml/json response formats to admin/info in controller.

#7 - 2011-04-15 19:44 - Jean-Philippe Lang

- *Status changed from New to Closed*
- *Resolution set to Duplicate*

Same as [#5901](#).

#8 - 2011-06-14 17:16 - Etienne Massip

- *Target version deleted (Candidate for next major release)*

Switched with [#5901](#).
