

Redmine - Feature #8146

How can I Hide "My page"?

Description			
Hi everyone,			
I'm doing some customizations on my Redmine system. Boss doesn't like the My page. How can I hide it? Would prefer to hide it for non-members and anonymous users. Thanks.			

History

#1 - 2011-04-14 09:17 - Etienne Massip

- Category set to My page

AFAIK, there is no option in Redmine, maybe MyPage should be made a module.

#2 - 2011-04-14 20:31 - Jean-Philippe Lang

Would prefer to hide it for non-members and anonymous users.

There's no 'My page' for anonymous users.

Thanks. Which controller handles My Page? Somehow it knows difference between anonymous and non-members. I'd like to restrict non-members if possible. Thanks.

- Status changed from New to Closed

- Resolution set to Invalid

Etienne gave you the answer. You can also disable it with a few lines of code from a plugin.
