Redmine - Defect #8151

project filter in issue search is overriden by current project

2011-04-14 16:08 - Gerry Hawkins

Status:	Closed		**Start date:**	2011-04-14
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate		**Affected version:**	1.0.4

Description

I created and saved a public search from the all issues page which included a filter of "project is <<all>>", OK effectively all for me as it is a multiselect with several projects selected, to capture work being done in a couple of projects for the same target version of a release.

However, if I am in a specific project that search restricts the output to that project even though the filter has "project is <multi selected projects>". To have the search work I have to be at the root level. I think that if the saved search has that filter set it should be respected.

(using 1.0.4 until 1.2.0 is out)
