

## Redmine - Defect #8157

### Redmine do not send notification emails if a recipients email address is not valid

2011-04-15 11:13 - Martin Schneider

<b>Status:</b> Closed	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Email notifications	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b> 4.0.0	<b>Affected version:</b> 1.1.0
<b>Resolution:</b> Fixed	
<b>Description</b>	
Reproduction: <ul style="list-style-type: none"><li>- Add a user with the name "TestUser" and a misconfigured email address (at my side it was something like <a href="mailto:UserTest@OurCompanyName.de">UserTest@OurCompanyName.de</a>).</li><li>- Let the "TestUser" create a ticket.</li></ul> Behaviour of Redmine when the newly created ticket is changed: <ul style="list-style-type: none"><li>- Redmine needs very long to respond (~2 min.).</li><li>- <b>Nobody</b> receives a notification email (e.g. the ticket creator, watchers, everyone with the "For any event on all my projects" email setting).</li></ul> My Redmine server configuration: <ul style="list-style-type: none"><li>- MySQL 5.1.41-3ubuntu12.6</li><li>- Ruby 1.8.6</li><li>- Rails 2.3.5</li><li>- Redmine 1.1.0</li><li>- SVN 1.6.12-1406.49 hosted via CollabNet Subversion Edge 1.2.1-1406.49</li></ul> Additional Information: <ul style="list-style-type: none"><li>- Our email server is Microsoft Exchange 2003</li></ul> <b>Fatal side effect of this bug</b> <p>We do a lot of subtasking. Sometimes when the user with the misconfigured email address adds a ticket into a deep subtask structure this structure will be corrupted!</p> <p>After a little database analysis I figured out, that the issues.lft and issues.rgt become inconsistent...</p> <p>PS: Redmine is pretty cool! We use it since some years and this is the first real problem with it. Keep on moving ;-)</p>

## History

**#1 - 2011-04-15 17:38 - Евгений Золотин**

I have the same problem. Today I've noticed, that notifications from forum were not send. Looking through production.log file I've found the reason: 550 error - unknown account. One of user's account has wrong e-mail, and other users can't receive e-mail notifications. I've tried to send e-mail to this wrong adress with other good adresses from MS Outlook, and I've received the same bug from automatic admin's e-mail: 550 unknown account. But other users with good addresses got my test e-mail. When Redmine do send it's notifications and one of the e-mail addresses is wrong, nobody can receive notifications. Seems that problem with Redmine.

**#2 - 2012-04-25 10:29 - Fabien Crespel**

This issue still occurs with **Redmine 1.3.3**.

When one project member with an invalid email address fails to receive a notification (e.g. 550 Recipient address rejected: User unknown in local recipient table), subsequent notifications are **not** sent to **any other member** involved in the issue/project.

As the account involved is a generic account in my case, I disabled all notifications for it. But if for a reason or another a previously valid email address becomes invalid (employee leaving a company...), it will block notifications for everyone else - which I think is a **major issue**.

**#3 - 2012-07-19 10:19 - Pieter Smith**

Same problem on our server (Redmine 1.4.2). Also tried to change the Blind carbon copy recipients (bcc) option on the 'Redmine': 'Settings'. 'Email notifications' page as a potential workaround, but it has no effect.

**#4 - 2013-08-22 16:33 - Miodrag Milic**

The issue is still present

**#5 - 2013-10-22 14:45 - Miodrag Milic**

Does anybody know some quick fix solution for this in source code ?  
For instance parallel sending of mails to each user and so on ?

**#6 - 2014-06-09 18:18 - James H**

is this still like this?

**#7 - 2014-07-25 02:10 - Toshi MARUYAMA**

- Duplicated by Defect #17318: Email Notifications Fails for All Members when One Email is Invalid added

**#8 - 2014-07-25 02:13 - Toshi MARUYAMA**

- Duplicated by Defect #123: One user's bad email address breaks all email notifications for everyone on a project added

**#9 - 2014-10-27 19:01 - James H**

+1

**#10 - 2014-11-03 06:58 - Go MAEDA**

- Related to Defect #6829: Emails not sent if server rejects one of the recipients added

**#11 - 2014-11-03 07:20 - Go MAEDA**

- Related to Defect #8733: Sending email fails when one of members has illegal characters in email address added

**#12 - 2014-11-03 07:22 - Go MAEDA**

- Related to Defect #5163: Rejection of one recipient by the SMTP server causes whole notification to be dropped added

**#13 - 2014-11-03 07:33 - Go MAEDA**

- Related to Defect #11167: Sending email notification to more than one users fail if one address email is invalid added

**#14 - 2015-01-28 10:49 - Dariusz Kowalski**

I have the same issue.

In our RM , we are connected do Ldap - there is many separated teams were people go in and go out even often. It is impossible to manage of that and disable each account manually. This is a big problem.

Anybody has solution for that issue?

**#15 - 2015-01-28 21:40 - James H**

@Dariusz

if you are connected to LDAP, why dont you just let LDAP handle the email addresses so you never have an invalid email address?

but still +1 to this issue. It also can still appear when using LDAP if the information in your LDAP is not correct. But that is a different underlying issue.

**#16 - 2015-02-08 16:30 - Toshi MARUYAMA**

- Related to deleted (Defect #6579: Tree hierachy being currupted on multiple submissions of an issue)

**#17 - 2015-03-12 08:16 - Toshi MARUYAMA**

- Duplicated by Defect #19360: the wrong mail in one of the redmine account will cause all mail stop sending added

**#18 - 2015-04-08 17:03 - Toshi MARUYAMA**

- Related to Feature #19335: Allow setting user account settings to read-only fields (especially when using LDAP) added

**#19 - 2015-09-06 11:43 - Toshi MARUYAMA**

It seems Redmine.org has this problem, too.

I watch some forum messages on Redmine.org and I don't get notification.

Issue form have watchers list, but forum message form does not have.

**#20 - 2015-11-03 06:25 - Toshi MARUYAMA**

- Duplicated by Defect #20912: First email notification isn't send to user added

**#21 - 2016-05-19 17:14 - John Simmons**

I know this is getting pretty old, but I'm having this issue as well. I have all of my users set through LDAP, so there's no defective email addresses, but we added some people who have external email addresses, and they login through non-LDAP, and it breaks any project they are added to. So, 99% of my users are @companyA.com, and 1% are @companyB.com, and any project where someone from company B is added, stops sending emails all together.

**#22 - 2016-09-14 14:25 - JW Fuchs**

+1

Just by looking at the list of related issues, this problem apparently has affected many redmine users. Is there any chance that there will be a solution anytime soon?

**#23 - 2017-01-11 16:01 - JW Fuchs**

Any updates on this?

**#25 - 2017-08-22 10:25 - Kenan Dervisevic**

Hello, does anyone have a solution for this currently?

**#26 - 2017-08-30 16:24 - Go MAEDA**

- Related to deleted (Defect #11167: Sending email notification to more than one users fail if one address email is invalid)

**#27 - 2017-08-30 16:24 - Go MAEDA**

- Duplicated by Defect #11167: Sending email notification to more than one users fail if one address email is invalid added

**#28 - 2017-08-30 16:58 - Jan from Planio [www.plan.io](http://www.plan.io)**

- Related to Feature #26791: Send individual notification mails per mail recipient added

**#29 - 2017-08-30 16:59 - Jan from Planio [www.plan.io](http://www.plan.io)**

This would be solved by #26791.

**#30 - 2017-10-19 21:32 - Juan Diego Iannelli**

+1

**#31 - 2018-07-12 14:26 - Holger Just**

- Duplicated by Defect #29226: Email delivery error: 550 Mailbox not found or access denied , there is an invalid email address added

**#32 - 2018-09-10 22:26 - Ken Zalewski**

This issue has persisted for years, and is now in the current version, 3.4.6.

It has affected us here at the Senate on multiple occasions when an employee leaves the Senate. That employee's email address is disabled/deleted, so any mail sent to that address returns a 550 SMTP error.

This has the end result of preventing ANY notifications from going out on a project where the terminated employee might be a member. This is bad behavior, and it's been reported multiple times by many Redmine users.

I am asking that this issue be prioritized. We depend on email notifications working properly, and we don't want project notifications to stop working just because one member on that project/group has a bad email address.

**#33 - 2018-11-05 10:54 - Richard Holyoak**

I can confirm this is causing me problems too. If one person leaves the company then no-one receives emails.

**#34 - 2018-11-05 10:59 - Go MAEDA**

Richard Holyoak wrote:

| *I can confirm this is causing me problems too. If one person leaves the company then no-one receives emails.*

This issue will be resolved in upcoming Redmine 4.0.0. The patch #26791 has already been committed to the repository.

**#35 - 2018-11-30 12:27 - Go MAEDA**

- *Status changed from New to Closed*
- *Assignee deleted (Jean-Philippe Lang)*
- *Target version set to 4.0.0*
- *Resolution set to Fixed*

Fixed by #26791.

Setting the target version to 4.1.0 in order to add this issue to the changelog.
