

Redmine - Defect #8167

Custom field of 'list' type always fail validation

2011-04-16 16:40 - Marcus Ilgner

Status:	New	Start date:	2011-04-16
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.0
Resolution:			
Description			
<p>Trying to create a new custom field 'operating system' with some pre-defined values, we always received the message 'Invalid default value' during creation or 'invalid value' during bug submission.</p> <p>After changing line 47 of app/models/custom_field.rb to read</p> <pre>v = CustomValue.new(:custom_field => self.clone, :value => *self*.default_value, :customized => nil)</pre> <p>everything seems to work fine now.</p>			

History

#1 - 2011-04-20 18:06 - Etienne Massip

Do you have any plugins installed ?

#2 - 2011-04-30 13:10 - Marcus Ilgner

A few but none that should interfere with issue tracking and/or custom fields as far as I can see from their code.

#3 - 2012-02-03 13:07 - Samuel Triaud

I got the same issue.

Redmine 1.3, no plugins.

If I destroy this issues' custom filed and re-create it, I did not encounter anymore this issue.
