<b>Resolution:</b>	Duplicate		
<b>Description</b>  When I move a ticket with a target version from one project to another (where the target version does not exist) the target version information is lost. I understand the reason behind this because the target version is project specific.  However, it might be good to issue a warning message (instead of silently deleting the version) or even allow the user to copy the version info into the other project.			
<b>Related issues:</b> Is duplicate of Redmine - Feature #5086: Add a warning to inform that target ... <div>New2010-03-15</div>
