Redmine - Patch #820

NoMethodError in SearchController

2008-03-10 00:20 - Angel Sciortino

Status: Closed Start date: 2008-03-10

Priority: Normal Due date:

Assignee: % Done: 0%

Category: Search engine Estimated time: 0.00 hour

Target version: 0.7

Description

Submitting an invalid project id to a search results in a NoMethodError from a nil object.

You have a nil object when you didn't expect it! The error occurred while evaluating nil.active?

app/controllers/application.rb:105:in `check_project_privacy'
app/controllers/search_controller.rb:41:in `index'

This patch checks whether the project exists first, and a 404 page is displayed instead. Test included.

Associated revisions

Revision 1237 - 2008-03-12 21:50 - Jean-Philippe Lang

Fixes #820: invalid project id causes a NoMethodError in SearchController (Angel Dobbs-Sciortino).

History

#1 - 2008-03-10 02:29 - Angel Sciortino

Applies cleanly to r1212.

#2 - 2008-03-12 21:51 - Jean-Philippe Lang

- Category set to Search engine
- Status changed from New to Closed
- Target version set to 0.7

Patch applied with slight changes in <u>r1237</u> (used a before_filter instead). Thanks
