

Redmine - Defect #8242

Clicking 'download' on repos file on timed out session fails weirdly.

2011-04-28 11:41 - André Jonsson

Status:	New	Start date:	2011-04-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.2
Resolution:			
Description <p>I had repos browsing and was about to click 'download' to check a file locally. Then I went on to something else, and came back long enough to the session to time out. On the open page, with the file being displayed, I clicked the 'Download' link to get the file. I was presented with a completely empty white page. Going 'back' and clicking somewhere else I (correctly) got the familiar (re)login page.</p> <p>'Autologin' disabled. What info is required to understand this?</p> <p>(couldn't find a fitting category, no session or authentication related categories)</p>
