Revision 1263 - 2008-03-16 15:54 - Jean-Philippe Lang

Trac importer:

- prevent duplication of associated trackers when the target project already exists (closes #829)
- warn user if the target project already exists

History

#1 - 2008-03-11 17:08 - Jean-Philippe Lang

Did you use the Trac importer for this project ?

#2 - 2008-03-11 19:56 - Marc Horowitz

Ah, yes I did.

#3 - 2008-03-11 20:35 - Jean-Philippe Lang

That's a bug in the Trac importer. I'll fix it to prevent this problem in the future.
Go to projects settings, uncheck the trackers, save, re-check them and re-save. You should no longer see duplicates.

#4 - 2008-03-11 20:37 - Marc Horowitz

I think that was enough of a hint. The database looks like this:

```
redmine=# select * from projects_trackers;
project_id | tracker_id
------------+------------
1 |        1
1 |        2
1 |        1
1 |        2
(4 rows)
```

Deleting the duplicate rows solved the problem. Perhaps this table should have a unique constraint across both columns? I believe this would remove the need for the existing index on project_id, as well.

#5 - 2008-03-16 16:17 - Jean-Philippe Lang

- Status changed from New to Closed

- % Done changed from 0 to 100

Applied in changeset r1263.
