<b>Description</b> It should be possible to enable/disable a "vote for this issue" feature per issue trackers, so for example the "Features" tracker could enable users to give +1 to issues they want to see next, and then make a report to get the "most wanted" features. Jira has a similar feature.

Have a look for the [Vote Plugin](#)

At the moment can't be enabled or disabled per tracker, but voting and counting works.

- Status changed from New to Closed

- Resolution set to Duplicate

Closed as duplicate of [#1011](#), itself resolved by the Vote plugin.

+1 for activating this feature on redmine.org

I forked and added the module to enable/disable feature, also several right for showing voters or not, or multiple votes per user.

At the moment it works for redmine 1.3, soon for redmine 1.4 (routes.rb missing)
