Description

In my custom field, which is an integer, if I enter "123 " it complains.
Can this be modified to strip trailing, and maybe leading?, white space?
I haven't testing the fields, like float, but suspect theymight have this issue as well.
(using 1.0.4 waiting for 1.2.0)

I wrote a patch to fix this issue.
Float custom fields allow leading and trailing spaces. Integer custom fields should also behave in the same way for consistency.
