<b>Target version:</b>	<b>Affected version:</b> 1.1.3
<b>Resolution:</b> Invalid	

**Description**

Database Version: Mysql Server CE 5.1  
Ruby Version: Ruby 1.8.7 (16-08-2010)  
Rails Version: Rails 2.3.5  
Redmine version: 1.1.3

With a clean upgrade to 1.1.3 it stopped reading mysql configuration completely and also fails to run as a subdomain(mod\_proxy).

See redmine.levelnull.de for a 'live error demo'.

Apache mod\_proxy config:

```
ProxyPass / balancer://redmine_cluster
ProxyPassReverse / balancer://redmine_cluster

<Proxy balancer://redmine_cluster>
  BalancerMember http://127.0.0.1:3001
  BalancerMember http://127.0.0.1:3002
</Proxy>
```

#### History

##### #1 - 2017-01-10 00:49 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Invalid

This question should have been posted on the forum and it is too old.  
Closing.
