Redmine - Defect #8319

Redmine 113 failing to load properly(500 Internal Server Error)

2011-05-07 18:41 - Michael Dirks

Status:	Closed		**Start date:**	2011-05-07
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	1.1.3

Description

Database Version: Mysql Server CE 5.1
Ruby Version: Ruby 1.8.7 (16-08-2010)
Rails Version: Rails 2.3.5
Redmine version: 1.1.3

With a clean upgrade to 1.1.3 it stopped reading mysql configuration completely and also fails to run as a subdomain(mod_proxy).

See redmine.levelnull.de for a 'live error demo'.

Apache mod_proxy config:

```
ProxyPass / balancer://redmine_cluster
ProxyPassReverse / balancer://redmine_cluster

<Proxy balancer://redmine_cluster>
    BalancerMember http://127.0.0.1:3001
    BalancerMember http://127.0.0.1:3002
</Proxy>
```

History

#1 - 2017-01-10 00:49 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

This question should have been posted on the forum and it is too old.
Closing.
