

## Redmine - Feature #8336

### Roles / Permissions overview - make scrollable like ticket list

2011-05-11 11:04 - Frank Helk

<b>Status:</b>	New	<b>Start date:</b>	2011-05-11
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Administration	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
<p>If multiple roles are implemented for fine grained access tunig, the roles&amp;permissions matrix view gets nasty because it won't extend to a schrollable frame in the page like a ticket list with many columns would do.</p> <p>Make it scrollable like the ticket list.</p>

+1

Another option could be adding a tooltip on every checkbox indicating which pair [role,permission] it's related to.

Another solution could be duplicating the permissions column to make it the first and the last of the table, that way finding out which pair [role,permission] we are working on would be possible in an environment with tens of roles such as ours

The lack of this feature makes us grant/revoke permissions role by role pretty often, which makes it really slow
