Git: Previous and Next links are confusing

Target version:				
Resolution:	Duplicate		**Affected version:**	0.9.0

Description

On the repository tab, using Git as the SCM, I clicked Previous and Next, and found out that previous went to the newer commits, and Next went to the older commits. I don't know if this is the case for other SCM's, but this was really confusing to me. I'm sure it can/will be to others as well.
