<b>Description</b> It would be nice, if there could be an additional way to create new wiki pages from a link besides the "edit", "watch", "history" links at the top of an exiting page.  After following this "new page"-link, there should be a form asking for: <ul style="list-style-type: none"><li>• the name of the new page (required)</li><li>• the name of the parent (optional)</li></ul> This is also related to issue <a href="#">#6449</a> .
