

Redmine - Defect #8370

side by side revision split is not at mid point of screen in Internet Explorer

2011-05-13 13:51 - Chris Magowan

Status:	New	Start date:	2011-05-13
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.2
Resolution:			
Description			
<p>When using Internet Explorer (both IE8 and IE9), the side by side view (when viewing differences in a file revision) does not have its split half way across the screen, like it does in Firefox and Chrome, instead it is somewhere away off the the right hand side. i have a large file, which has some lines which are quite wide (wider than my screen). in order to see the right hand revision i have to scroll to the bottom of the page, move the scroll bar over, so that i can see the right hand revision, then scroll back up the page again. not ideal.</p> <p>i am running Redmine 1.1.2.stable (MySQL)</p> <p>Thanks Chris</p>
