- File *show.html.erb.patch* added

better patch mod.

#8 - 2013-10-18 19:46 - Luke van der Westhuyzen

+1 for subprojects as a bulleted list instead of comma delimited single line.

#9 - 2013-10-19 04:33 - Mischa The Evil

- Subject changed from *make subprojects list more visible* to *Display subprojects as individual unordered list items on project overview*

This can be unwanted for instances hosting projects with lots of subprojects, since it will produce a long list which increases page-scrolling for the overview page a lot.

Perhaps the solution would be to allow admins to choose if Projects Overview uses bulleted lists or comma separated lists. This complicates the patching a bit since it would require a new setting (in Settings > Display or Settings > Projects).

#13 - 2013-11-05 17:47 - Christoph Klessner

+1 for subprojects as a bulleted list instead of comma delimited single line. Preferably in alphanumerical order.

#14 - 2014-01-30 07:30 - Vikram Lele

+1 for subprojects as a bulleted list, ideally a settings option (Settings > Display or Settings > Projects)

#15 - 2014-02-14 15:30 - John Doran-Armstrong

+1! :)

#16 - 2014-04-16 15:32 - Luis Furtado

include a way to list it using API.

+1 Even a per-project setting would be good, that way project managers can decide the best display for their project. Another option would be to use a collapsible tree structure given that most sub projects are likely to be hierarchical.
