Target version:	3.1.0		
Resolution:	Fixed		
Description			
Allowing to force a issue private when receiving emails would be useful in a helpdesk utilization.			
ex:			
<pre>rdm-mailhandler --url https://domain.foo/redmine --key secret --private yes</pre>			
thank you

No changes on this? I tried to change the mailhandler-script, but seems like the API does not support it, does it not use the regular API?

```
diff test-rdm-mailhandler.rb rdm-mailhandler.rb
90d89
```

We really need this feature.
