Description

I have two projects, each of which has one or two subprojects.

In case of the project having a subproject has no problem, but the other one shows a problem on it's summary page.

Two subprojects which belongs to it reports summary in normal, however the mother projects shows a single character '-' on every fields as if the subprojects has none of open/closed issues. (Except "Subproject", which the only thing the summary page behaviors correctly)
