Description Please add http://www.pixel-cookers.com/2010/03/05/theme-redmine-pixel-cookers/ (now on github: https://github.com/pixel-cookers/RedmineThemePixelCookers) as the default theme. It feels and looks better than the default theme. Many users on pixelcookers site requested this as the default theme for redmine. I also added some more intuitive icons from silk icon set to it. I think it would be a honor for the developer of the theme to integrate his work in your software :)

I like the Redmine default theme, btw.

Please don't assign tasks directly.

The layout isn't good because you loose width, which is needed for content instead of menu.
Could be solved by javascript fading in out menu.

The theme has not been updated for 5 years and probably does not support the latest version of Redmine.
