

## Redmine - Defect #8435

### LDAP authentication

2011-05-25 11:31 - Ken Chan

<b>Status:</b>	Closed	<b>Start date:</b>	2011-05-25
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	LDAP	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	1.1.3
<b>Resolution:</b>	Invalid		

**Description**

I find that the LDAP authentication sometimes works and sometimes fails when I user sAMAccountName attribute to verify the account. However, when I use userPrincipalName attribute as the user logon, it works.

By the way, I am using Active Directory on Windows Server 2003

### History

#### #1 - 2011-05-25 12:11 - Etienne Massip

If you think this is a Redmine bug, please provide all details (what means "fail" ??) (see [SubmittingBugs](#)).

BTW, I don't think it is, as I'm using RM against AD on WS2003 too and have no problem with sAMAccountName.

#### #2 - 2011-05-25 12:11 - Etienne Massip

- Category set to LDAP

#### #3 - 2011-05-25 12:12 - Ken Chan

The LDAP authentication fails when I allow user to create accounts on the fly.

After trial and error, I found out the LDAP authentication actually does not fail. I also found out that "The user is invalid" because there is already user with the same log-on name in Redmine. This prevents creation of account on the fly, hence generate the "the user is invalid".

#### #4 - 2011-05-25 12:21 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

Ok, so I can close this issue.
