

Redmine - Defect #8448

Bio::DB::BigWig throws exception when a bin is requested that contains no data

2011-05-27 05:35 - Robert McLeay

Status:	Closed	Start date:	2011-05-27
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>I seem to have run across a bug in Bio::DB::BigWig, where if I request a region containing no data, I get the error:</p> <p>Can't call method "next_seq" on an undefined value at /usr/local/lib/perl/5.10.1/Bio/DB/BigWig.pm line 658</p> <p>Sample code to produce this is:</p> <pre>my \$bin = \$bw->features(-seq_id =>"\$chr", -start => 1, -end => 100, -type =>'bin');</pre> <p>It seems that so long as I request a region encompassing at least one base for which the WIG contains data, everything works as expected.</p> <p>Thanks!</p>
