

Redmine - Defect #8458

Subversion: Delete invalid repository fails using the libsvn plugin

2011-05-29 12:50 - André Jonsson

Status:	Closed	Start date:	2011-05-29
Priority:	Normal	Due date:	
Assignee:	Toshi MARUYAMA	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.3
Resolution:			
Description			
Only tested with svn repositories, using the libsvn plugin.			
When an unreachable repository has been entered it is impossible to delete it. Apparently it requires the repository be valid and able to connect to be deleted.			
For example, entering the repos url svn://localhost will cause delete to fail with the attached log message 1.			
And entering a correct repos url but with incorrect login info fails similarly, with attached log message 2.

Associated revisions

Revision 6130 - 2011-06-30 05:46 - Toshi MARUYAMA

scm: return nil at model default_branch and override at git model (#8458, #6713).

Redmine Git and Mercurial adapter support **branches**.

Mercurial default branch is **default**.

But, it is popular to show all revisions on the top page for Mercurial GUI.

Revision 6220 - 2011-07-10 13:08 - Toshi MARUYAMA

scm: git: catch exception in model default_branch() (#8458, #6713).

Revision 6224 - 2011-07-10 17:47 - Toshi MARUYAMA

scm: subversion: add functional test of destroying valid repository (#8458, #6713, #4725).

Revision 6225 - 2011-07-10 17:48 - Toshi MARUYAMA

scm: subversion: add functional test of destroying invalid repository (#8458, #6713, #4725).

History

#1 - 2011-05-29 12:56 - André Jonsson

For correctness I should probably mention that after changing the repos settings to something that is possible to connect with, delete works, of course.

#2 - 2011-05-30 02:32 - Toshi MARUYAMA

- Assignee set to Toshi MARUYAMA

#3 - 2011-05-30 02:43 - Toshi MARUYAMA

- File git-scm-nil.diff added

Try this patch.

#4 - 2011-05-30 10:02 - André Jonsson

Awesome!

However, I see that it modifies some generic part and a git-specific part (I'm not much familiar with Ruby nor the Redmine code base), but as far I've seen this problem is specific to SVN.

Of course, that doesn't exclude that this patch is the "right thing"... I'll give it a go later.

#5 - 2011-06-05 09:24 - Toshi MARUYAMA

- Target version set to 1.3.0

#6 - 2011-06-07 00:39 - André Jonsson

I've tested the patch. Indeed it works!

However, I'm quite baffled as to why it works... considering it seemingly modified the behavior of managing **git** repositories.

#7 - 2011-06-07 00:41 - André Jonsson

btw, sorry for the slow feedback; we had a long weekend over here and I was away a bit.

#8 - 2011-07-10 17:01 - Toshi MARUYAMA

- Subject changed from Delete invalid repository fails to Subversion: Delete invalid repository fails using the libsvn plugin

- Target version deleted (1.3.0)

#9 - 2011-07-10 17:56 - Toshi MARUYAMA

- Status changed from New to Closed

Redmine subversion adapter#info returns nil if repository path is invalid.

[source:tags/1.2.0/lib/redmine/scm/adapters/subversion_adapter.rb#L86](https://sourceforge.net/p/redmine/bugs/1201/)

libsvn plugin adapter#info throws exception if repository path is invalid.

https://github.com/pplr/redmine-libsvn/blob/0662d754198723b6e8ad9c941d883fc5691b94f9/lib/redmine/scm/adapters/subversion_libsvn_adapter.rb#L87

This is plugin issue.
