Can't reproduce on <http://demo.redmine.org>, this could be a plugin compatibility issue, could you try without plugin ?

I tried without the plugin and the issue is still there.

btw, Etienne - who is running demo.redmine.org? I don't know who to ask to turn "REST API" on there so I can try Redmine Java API with that site (since my local Redmine 1.2.0 install does not work)
