Description
There's a checkbox in the Git repository settings whose label is far from self-explanatory, and it is undocumented as far as I can tell.

History

#1 - 2011-06-07 03:50 - Toshi MARUYAMA
- Category set to SCM

Please see #8365.

#2 - 2012-04-30 12:30 - Tiago Franco

Agree. What does the option "Report last commit for files and directories" mean?

Thanks.

#3 - 2012-05-18 07:41 - Hiroaki Nakamura

I could not understand what it means too, so I read the source and found out.
source:trunk/app/views/repositories/_dir_list_content.html.erb

If you set the option "Report last commit for files and directories", four columns are added on repository file lists:

- revision
- age
- author
- comments

#4 - 2012-06-11 12:31 - @ go2null
- Status changed from New to Resolved

Added to Wiki [[RedmineRepositories#Create-the-bare-repository]] which is referenced by [[RedmineProjectSettings]].

#5 - 2014-06-17 01:11 - Lukas Pirl

Why is this label still around? :) It is still not intuitive at all…
What about "Display properties of latest changing commit for files and directories" or just "Display latest commit for files and directories"?

#6 - 2014-08-15 17:55 - Jan Niggemann (redmine.org team member)
- Status changed from Resolved to Closed
- Resolution set to Fixed
