Redmine - Defect #8593

[REST API] getIssues() or getIssueById() fails and raise an MarshalException

2011-06-11 14:01 - Alex -

Status:	Closed	**Start date:**	2011-06-11
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Custom fields	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	1.1.0

Description

Hi,

I'm having trouble fetching issues with the Redmine API in java.
I already contacted the planio support but they advised me to talk directly to you.
https://rocket.plan.io/track/18510/9d8f212826b5ae6fff71fcfb873ce09e

There you would find the stack trace I get when I run a basic code also included there.

They think the crash is related to the customs fields no being properly escaped.
I tried the pre-compiled version (1.0.8) from https://code.google.com/p/redmine-java-api and then I compiled the latest version (1.1.0)

If you need anything, tell me.

Thanks in advance

History

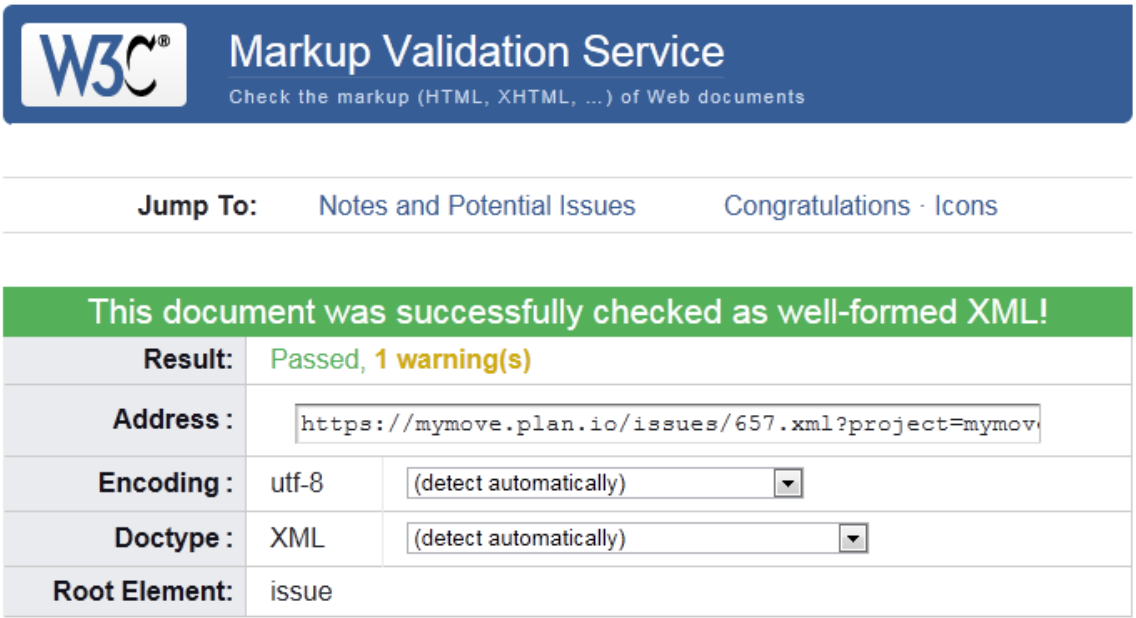
#1 - 2011-06-11 14:50 - Etienne Massip

- File issue_xml_validation.png added

- Status changed from New to Closed

- Resolution set to Invalid

According to W3 validator, the issue XML is ok :



Redmine-java-api is using Castor OXML mapping, guess this is what is actually failing, check http://code.google.com/p/redmine-java-api/issues/list or please report the issue here.
