Sorry, but Rails 2.3 (used by Redmine) is not compatible with rake 0.9.2. To be honest, even Rails 3.0 is not compatible with rake 0.9.x. You should

install rake 0.8.7 with the following command : `gem install rake -v=0.8.7` and stick with this version for now.

It wasn't mentionned in [RedmineInstall](#) so you couldn't know, I added it. Sorry for the inconvenience, but this time, it's not our fault ;-)
