Target version:				
Resolution:				

Description

I need to view journals information in REST API.
Features:

- search by create_on in journal
- search by custom_field or field (issue or may be something else)
- search by user_id
- search by journalized_id, journalized_type

History

#1 - 2011-06-17 10:23 - Etienne Massip

Journal is a general concept used to track issue modification, guess that should be part of issue REST API and not be directly queried.
