

Redmine - Defect #8638

Cannot Login

2011-06-17 06:03 - Crowella Spreva Farning

Status:	Closed	Start date:	2011-06-17
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>I have two redmine servers say XServ and YServ. XServ uses v1.1.3 while YServ uses v1.2.0. Both servers use database in XServ (thus YServ connects to XServ).</p> <p>Problem is after configuring database.yml and doing DB migration in YServ, I cannot login anymore to XServ. Although I can login with the same account in YServ. Both servers are running only that I cannot login in XServ.</p> <p>to grant privilege to YServe, I have executed the following command in mysql (centos):</p> <pre>grant all privileges on *.* to root@192.XXX.XXX.XXX identified by 'password';</pre> <p>then 'flush privileges'</p> <p>I tried to do again migration in XServ. 'rake generate_session_store' it only prompts: Rake aborted Access denied to 'root'@'localhost' (using password: NO)</p> <p>please help me on this matter</p>			

History

#1 - 2011-06-17 07:31 - Crowella Spreva Farning

let me clarify it's login to redmine

#2 - 2011-06-17 10:46 - Etienne Massip

- Status changed from New to Closed

- Assignee deleted (Eric Davis)

- Resolution set to Invalid

You forgot to set your db login/password in config/database.yml.
