redmine works in production mode

subtasks are tested (among other things) with every Redmine Java API (<http://code.google.com/p/redmine-java-api>) automated build. works fine with the last Redmine 1.1. Not tested on 1.2 yet.

#3 - 2011-06-29 20:34 - Nicolay Punin

I used Active Resource Library(http://www.redmine.org/projects/redmine/wiki/Rest_api_with_php). Maybe I did something wrong. I will try to use Java library and write about results.

#4 - 2011-07-23 07:19 - Alex Last

I switched Redmine Java API to be tested with Redmine 1.2.1 (with every auto-build).
