

## Redmine - Feature #865

### Use site name in emails instead of "Redmine"

2008-03-15 00:42 - W Snyder

<b>Description</b>			
<p>Rather than a hardcoded "Redmine" in the translation files, for example: mail_subject_lost_password: Your Redmine password</p> <p>I'd suggest using "Your %s password" where the format string comes from the name of the site. This is because I got a an email from the "real" redmine.org, plus one from my site, and got all confused.</p> <p>I've manually hardcoded the files for my use, but it would be nice not to have to maintain a patch.</p> <p>Thanks</p>
