

Redmine - Defect #8656

Private issues visible in the roadmap

2011-06-21 11:52 - Marco Battistoni

Status:	New	Start date:	2011-06-21
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues permissions	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.0
Resolution:			
Description			
<p>I have created a couple of private issues and I test who could see it. This works correctly, the person to who I have assigned the private issues is th only one who sees them. I checked in the activity of other users and correctly, nothing is displayed. Then I create a roadmap and I inserted these 2 issues. The issues are displayed in the roadmap but shown only if you are the owner of the issues or the assignee.</p> <p>I do not know if this was done on purpose or if it is a bug but I think itis not really clear ... at the first glance it can be interpreted as a bug.</p> <p>My solution would be as in all the other tabs - Activity, Issues, etc. there are not shown,, so I would keep consistency and not show them also in the road map ... so definitely like this is a private issue.</p> <p>Thank you.</p> <p>Marco</p>			

History

#1 - 2011-07-03 17:07 - Jean-Philippe Lang

The issues are displayed in the roadmap but shown only if you are the owner of the issues or the assignee.

I don't get it. What is the difference between displayed and shown?

#2 - 2011-07-04 08:27 - Jan from Planio www.plan.io

I think "displayed" means that they appear in the activity list and "not shown" means that he cannot accesed them because `Issues#show` yields a 403. I did not try to reproduce, I'm just trying to interpret :-)
