

Redmine - Defect #8667

How to create tickets with custom fields?

2011-06-22 12:12 - Sanjay Kashalkar

Status:	Closed	Start date:	2011-06-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.0
Resolution:	Invalid		
Description			
<p>Hello Jean, You mentioned in ticket #6345 that:</p> <p style="padding-left: 40px;">You can now use the piece of xml that the API returns to update custom fields:</p> <p>What I get back from the REST API is:</p> <pre><custom_fields> <custom_field name="Heading Number" id="2"/> <custom_field name="abc_id" id="14"/> </custom_fields></pre> <p>Now, im trying to create a ticket with custom fields with the following data:</p> <pre>&lt;custom_fields&gt; &lt;custom_field name="abc_id" id="14"&gt; &lt;value&gt;RQ_1&lt;/value&gt; &lt;/custom_field&gt; &lt;/custom_fields&gt;</pre> <p>but this continues to result in (422) Unprocessable Entity.</p> <p>I know the REST API is in beta status but I hope you can help me anyway.</p>
