

Redmine - Defect #8854

Filter on category across subprojects does not work

2011-07-19 19:52 - Joshua Stein

Status:	New	Start date:	2011-07-19
Priority:	Normal	Due date:

Category:	Issues filter	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
filtering an issue list based on a category that is also in a subproject does not work.			
I was not sure if this is fixable as the category list is defined separately for subprojects.			
Steps to Reproduce:			
1. Go to the Issues list for a project that has sub-projects			
2. Add a filter for "Category"			
3. set "Category" to a value that is defined in the parent and sub projects both.			
Notice that results do not include subproject issues.			
This bug was found on our own Redmine server running 1.0.1. It was upgraded to 1.2.1 but the bug still exists.			
I then tried on the Redmine Demo site. It is still an issue there.			
I saved a query for sample.
