Redmine - Defect #8931

Repository parsing content by application-server (.cfm)

2011-07-28 13:20 - Michael Diederich

Status:	Closed	**Start date:**	2011-07-28
Priority:	Low	**Due date:**	
Assignee:		**% Done:**	0%
Category:	SCM	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	1.2.1

Description

When I access the repository, I can view .html and .txt files. But when I want to see .cfm files, they are parsed by the coldfusion server (due to the file ending) and I get an error. It should be handled the same way you handle files like php.

system:

```
About your application's environment
Ruby version              1.8.7 (i486-linux)
RubyGems version          1.3.7
Rack version              1.1.1
Rails version             2.3.11
Active Record version     2.3.11
Active Resource version   2.3.11
Action Mailer version     2.3.11
Active Support version    2.3.11
Edge Rails revision       unknown
Application root          /var/www/redmine
Environment               production
Database adapter          mysql
Database schema version   20110511000000
```

error:

```
The web site you are accessing has experienced an unexpected error.
Please contact the website administrator.

The following information is meant for the website developer for debugging purposes.
Error Occurred While Processing Request
File not found: /projects/......../repository/revisions/680/entry/cfdocs/admin/template/artikel_ty
p.cfm
```

History

#1 - 2011-07-30 10:51 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

> It should be handled the same way you handle files like php.

Redmine does not handle php files in any particular way. This is a web server configuration issue.
