Description

If you can add "My tickets" menu item (just between "My page" and "Projects"?), it will really great time-saver for us. Most of us, including me, are working on several projects at the same time, so this would be one of most visited menu items for us.

This can be configurable, so users who don't like can can turn this feature off... maybe ;)
Also, there can be configurable state of "My tickets", if they are just "Assigned to me" or "All tickets". The second choise can be usefull for project managers, who take care for all tickets in system.

So, it will lead to "http://redmine.myserver.com/issues"

#2 - 2008-04-01 01:13 - Maxim Krušina

Maybe it can be just "Tickets" which will list all tickets across all projects.
(I just added this to my trunk and it's really handy).
Maybe put to refs, if users wants to see all tickets or his tickets only by default?
Or there can be select box to choose from predefined queries....

#3 - 2012-10-27 23:13 - Daniel Felix

Well, those "All Tickets" or "My Tickets" could be already seen on "My Page". If you add the corresponding widgets, you can always see, which tasks are still open for you.

Since version 1.4.0 there is a "shortcut for assigning an issue to me" (#1102). And it can be used in Custom queries feature. This combination will behave exactly as described.
